

LOAD-VIEW<sup>®</sup>

'Solutions for a more Energy Efficient business'

# Load-View®

Combat energy costs with the most sophisticated aM&T solution on the market ...

## Benefits:

Load-View® is the next generation in Energy Monitoring Systems. It can be combined with conventional plant data to compare energy against known and variable constants:

- Run consumption trials on 2 identical lines
- Calculate your carbon emissions
- Monitor energy at source
- Tease out best energy consumptions from plant to plant & compare energy usage/trend
- Measure at key sub metering points
- Electricity: kWhr v Batch production cycle
- Monitor a wide array of energy sources (single & multiple metering points) in one or more sites.

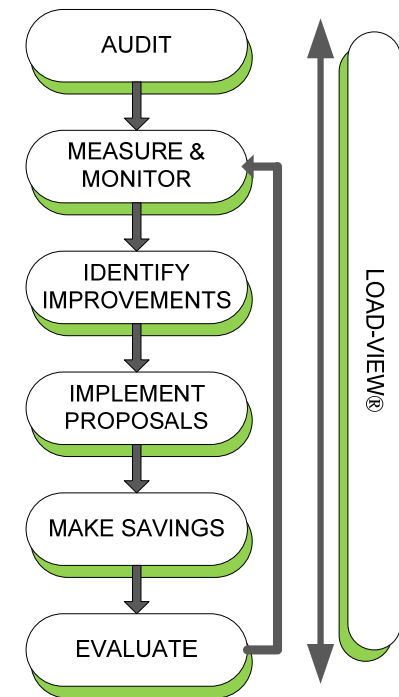

## The Package:

Load-View® is supported by a team of energy and process control professionals who are actively involved day in, day out in Energy Audits and Improvements.

Developed through customer requirements and generated by rising energy costs, Consolution are committed to Monitor Evaluate and improve energy consumption.

**'Organisations that switch to using aM&T equipment identified 12% carbon savings and achieved cost savings of 5% through reduced utility consumption, on average'**

Source: Carbon Trust  
(Advanced Metering for SME's: Carbon and Cost Savings)

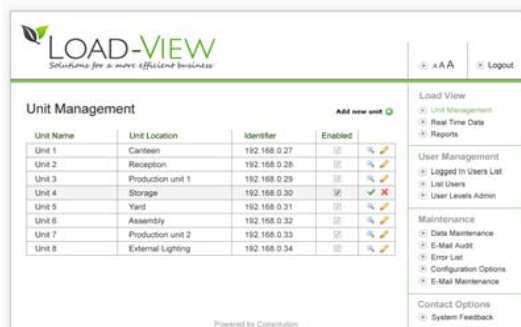

## Products Features:

### Fully Web Enabled:

The latest in web based technologies, result in Load-View® providing users with simple statistical results, to highlight energy problem area's. These can be viewed in the format of graphs and reports.

### Energy Analysis:

Load-View® allows for the analysis and comparison of all Production Data: Energy Vs Raw Materials being a specific example.

### Scalable Architecture

Load-View® is a scalable system, designed for single and multiple points across one or more sites.

### Exception Reporting:

Automatic alarms are a key benefits to users, and are reported via Email and SMS message.

### System Configuration

The system enables users to complete 100% management and security online.

### Data Collection

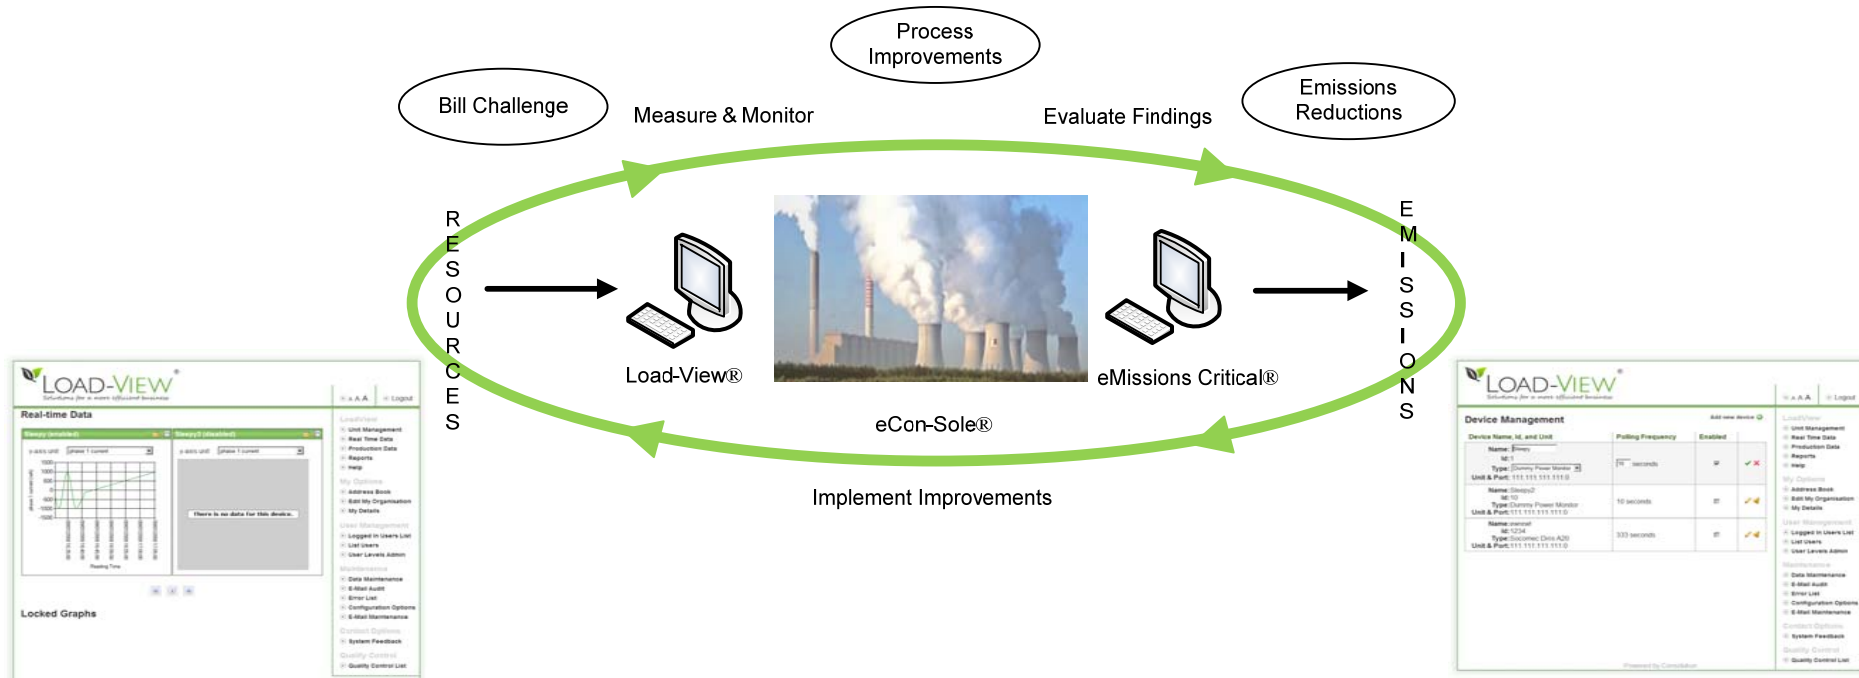

Load-View® collects and stores historical data from all sources including Water, Gas, Electricity and Steam.

**'A complete Sub Metering System'**

Load-View®	
Energy Meters	✓
Monitoring Panels	✓
Install Complete Systems	✓
Retrofit to Switch Gear	✓
Web Enabled Software	✓
Alarm Reporting	✓
Historical Data Storage	✓
Monitor Other Sources	✓
Input Production Data	✓
Compare Data	✓
Web Enabled Security	✓

## How Load-View® fits into your organisation:

## What next?
