

Consolution

"solutions for a more efficient business"

SeriDAQ™

Get information from your legacy equipment into your site wide management systems...

The features:

Consolution can now offer Data Acquisition support for a wide range of industrial process and laboratory equipment that employs serial technology. Whatever serial format your equipment employs, Consolution's SeriDAQ will interface seamlessly to extract key information and present it to your plant data management system directly across your site LAN .

- Extract only the data fields you need to see.
- Time and date stamp to shift patterns.
- Present and format batch report information.
- Present in any Microsoft application format.
- Present to any plant management relational database (RDB) including Access, SQL Server, MySQL, Oracle on a variety of platforms including Windows, Linux etc. DDE Link, OPC.

Typical Equipment may include:

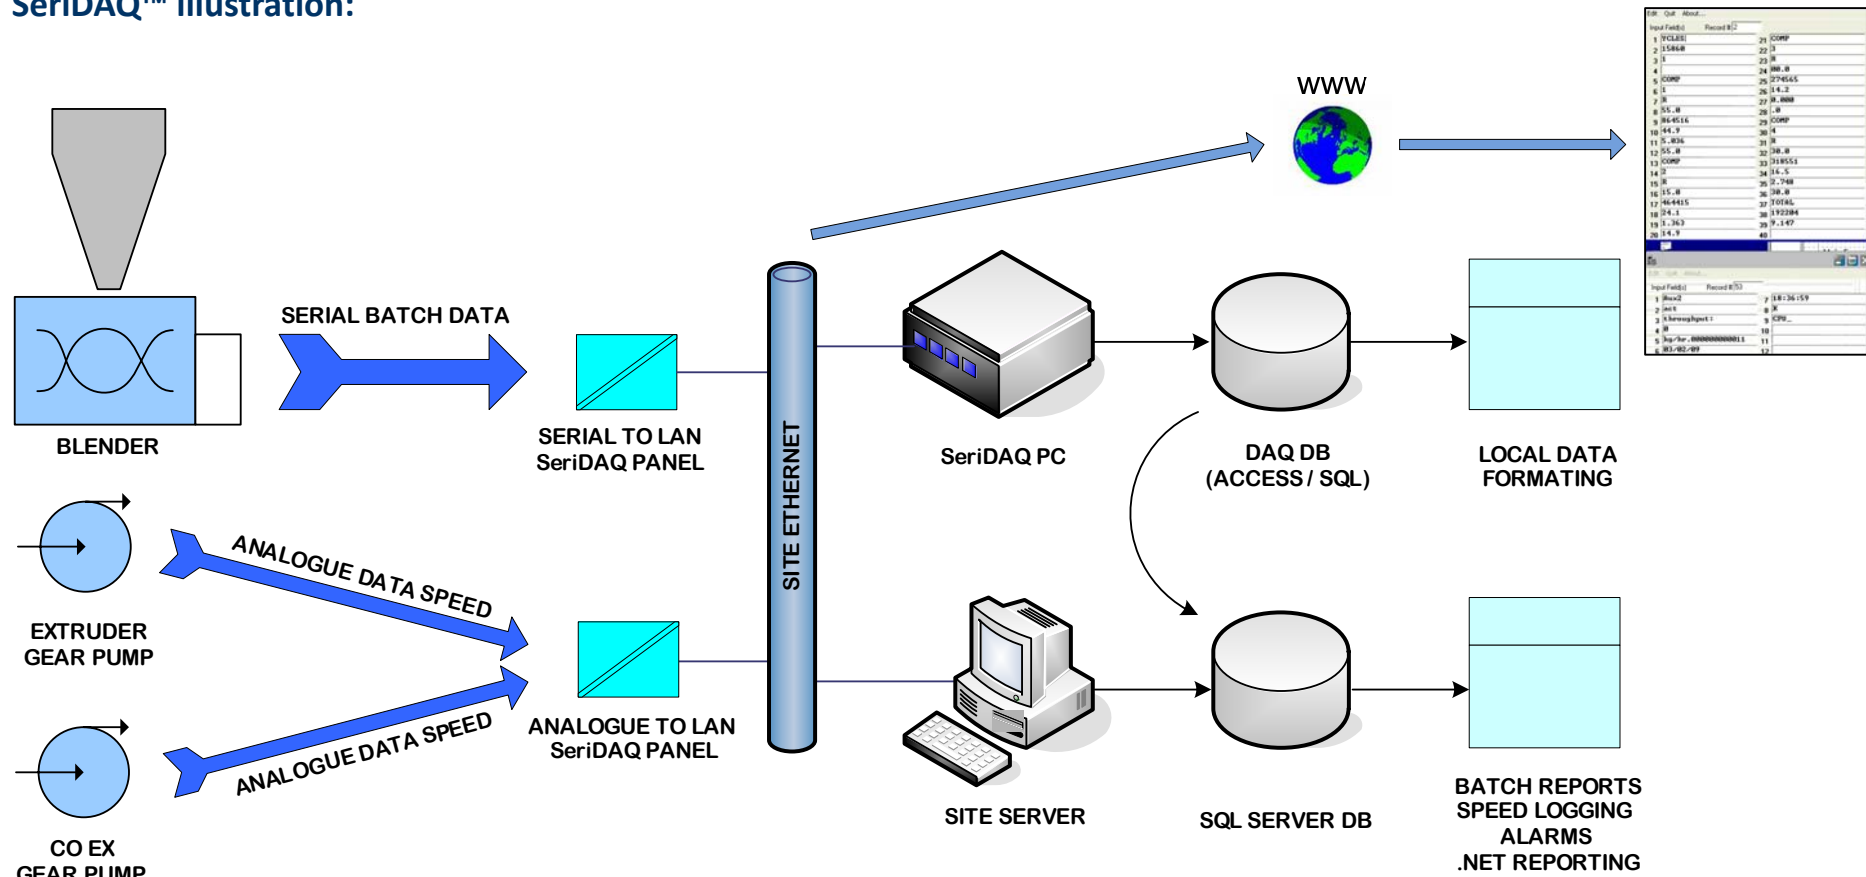

- Industrial Blenders / Mixers
- Material handling equipment
- Batch Weighing Equipment.
- Laboratory data loggers.
- Scanners

Serial Formats supported:

- RS232
- RS422
- RS485 (Modbus/JBus).

In additional to modern digital and analogue conventional data collation.
