

## Case Study

# Consolution

*"Solutions for a more efficient business"*

➤➤➤ **Case Study:**  
Energy Efficiency Services

➤➤➤ **Customer:**  
Vita Compounding

➤➤➤ **Project:**  
Energy surveys and  
Improvement projects

### Our Challenge:

Consolution Energy Efficiency Services has an agreement with Vita Compounding (Vita Group Ltd) to carry out energy surveys and improvement projects across all of their UK businesses.

Our experts use a hands-on approach to energy efficiency survey work and utilise professional engineering appraisal techniques to identify opportunities for reducing energy costs and improving energy efficiency across a wide range of manufacturing processes.

The process of auditing existing energy utilisation and making sensible assessments about the most efficient way each business can improve its energy efficiency without compromise to the manufacturing processes.

First pass surveys carry potential savings in excess of 15% of annual energy costs. These 'real and practical' opportunities have been converted into project proposals.

“We at Consolution believe that great relationships with our clients are the key to success. We aim to meet and beat our clients expectations.

Our excellent feedback is an indication of our success!”

**Brian Kirkland: Director**

### **Client Comments**

*“Consolution are helping us to identify significant savings across the division and they have a very professional approach to energy management. They provide a practical and realistic assessment of opportunities and work well with individual businesses. The collaborative approach used to manage the capital Investment programme is very refreshing.*

*We look forward to continuing our relationship with Consolution as they help us manage energy utilisation and improve our bottom line performance, with sustainable improvements”*

**Paul Wright:  
Divisional Finance Director**

### **The Solution:**

Monitoring and measuring performance is an important final step Consolution utilise, we develop an energy management programme with key performance indicators and cost reduction targets to monitor and measure progress of the energy efficiency programme. Significant savings are being unlocked by implementing some simple, quick payback projects followed by a number of more complex, site specific projects.
